

Customer Supplied Material Printing Guidelines

1. Clonex does not grant guarantee for printing on material provided by Customer.
2. For printing on the material supplied by Customer minimal accepted dimensions are 1x1m.
3. Before printing of the finished products, a test print is required.
4. A test print is made at the expense of Clonex (max. 1 sqm).
5. A test print should be verified in terms of print quality, strength, creases and also application of the final product.
6. The final product will be printed upon written acceptance of a test print and order form sent by email.
7. When roll printing is concerned, the amount of 3m should be added to the total amount of sqm for the purpose of running the printing machine and extra 3 m for the ending.
8. Due to the possible damage of material during printing process, Clonex reserves the rights to supply larger amount of material in relation to the nominal quantity given in the order (15%-20%).
9. In case of printing on the flat materials it is necessary to supply material with additional bleeds, minimum 10 cm added to all sides.
10. In case of supplying Customer material, it is necessary to inform customer service representative about delivery date. Lack of this information may result in refused delivery.
